

Track C: Prevention Science

Landon Myer, South Africa

Landon Myer is Director and Head of the School of Public Health & Family Medicine at the University of Cape Town, South Africa, where he is also Professor in the Division of Epidemiology & Biostatistics. He has training in clinical medicine, social anthropology and epidemiology. His research focuses on women's, maternal and child health in the context of HIV. He has led multiple clinical, epidemiological and health systems studies investigating HIV prevention in women, the health of HIV-infected women receiving ART during pregnancy and postpartum, perinatal HIV prevention, and the health and development of HIV-exposed and -infected children and adolescents.
